Keita Turner, of Keita Turner Designs, is a New York-based designer whose work has been featured in such publications as House Beautiful, Architectural Digest, and The New York Times. She creates interior spaces for both residential and commercial clients across the country. Through her brand, Livvy & Neva, Turner creates and curates collections of vintage and contemporary pillows. *keitaturnerdesign.com*

Cover, from **Poliform's** Senzafine collection, flawlessly combines functionality, modern aesthetics, and distinctive elegance while seamlessly concealing whatever it is you want to hide.

The Integrated Wine column by **Fisher & Paykel** is the ultimate kitchen showpiece for both the homeowner who values modern aesthetics and the cultivated wine collector who is seeking exceptional wine storage. I love how these cooling columns are designed to fit flush with cabinetry for a beautifully seamless installation.

I am blown away by **Edward Fields'** Ice Crystal Border I: a stunning geometric abstract area rug from the On-The-Fringe Collection. The unconstrained artistry of the collection makes it the ideal choice for dressing the floor or the wall.

Enamel, exclusive to **Artistic Tile**, is an alluring ceramic tile collection sourced in Spain, that has a distinctive painterly effect. Offered in six stunning nature-inspired colors, Enamel will bring strong stylish presence to both commercial and residential interiors.

Hans Krug's Line custom cabinetry in DOM American walnut veneer simply embodies the best of what I consider unpretentious elegance. Both modern and classic, I could never tire of this Line. Pun intended.

The Floair Collection from **Florense** delivers minimalism and a sense of lightness without neglecting sturdiness and functionality. Details include hidden hinges and embedded LED lighting. It's the ideal cabinet, curio, or closet system for any contemporary interior.

Eggersmann knows a thing or two about designing the best modern bespoke kitchens that are not only technologically advanced, but also built on key Bauhaus architectural principles. This light airy kitchen boasts two different warm oak finishes and Taj Mahal stone counter surfaces.

The Tam Tam side table, designed by Moss & Lam, through **Holly Hunt**, is imaginative, whimsical, and sculptural. I love that each unique table is handcrafted using the ancient technique of scagliola.

Holly Hunt's Oryx outdoor dining table is one of the most beautifully nuanced table base silhouettes I have seen in a while. It is a sculptural manifestation of the elongated horns of the oryx, a regal and beautiful desert animal.
