

# KEITA TURNER

## BRIEF DESIGN PHILOSOPHY

“My design philosophy is about creating surroundings that will play a beneficial and spiritually uplifting role in my client’s lives! I am an interior designer whose business is about creating transformative environments that evoke a sense of *Enduring Fashionably Classic Style*, but most importantly that uplift the human spirit. Although, I employ an individual and altruistic approach, my projects are characterized by a bold, plus timeless elegance. Using lifestyle as my canvas and fashion as my muse, I design interiors that convey the inspirations, spirits, and habitudes of my clients. The project influences the style – the structure of the interior, the location, and the client. Design is all about suitability.”

While, Keita is not confined to a particular look, her designs are characterized by a confident, chic and ageless elegance – a harmonious, smart, tailored, thoughtful and visually stimulating mix of colorful hues, vibrant accents, subtle tones, organic surfaces, tactile textures, metal finishes and translucent materials. Architectural elements, antique and vintage pieces, contemporary furnishings, sophisticated colors, refined details, high quality materials, exquisite textiles, spatial proportion, scale, emphasis and rhythm all result in interiors that invigorate, inspire, calm, and balance the senses.
