BUSINESS OF HOME

SURVIVAL MODE

Kaitlin Petersen, editor in chief of design industry resource *Business of Home*, investigates how some retailers are innovating through a crisis.

MONTHS OF QUARANTINE have been a bittersweet boon for the home goods industry—who hasn't taken a critical look at their space and found a few corners that could use an upgrade? The challenge has been to harness that enthusiasm without a key selling tool: brick-and-mortar stores where customers can touch fabrics and sit on sofas.

This spring, consumers began shopping online in earnest, embracing services like grocery delivery in droves. One McKinsey & Company study found that shoppers and businesses alike had made five years' worth of advancements in digital adoption in the first eight weeks of shutdown. What's more, 75 percent of first-time digital users told researchers that they would continue to use the digital channels even after the pandemic subsides. The message to retailers was unmistakable: **Get online if you want to survive.**

From Mitchell Gold + Bob Williams and Parachute to CB2 and The Container Store, retailers

have discovered that virtual design consultations are a great way to engage with customers. What's more, they work. Parachute founder Ariel Kaye says that **the average order value for a virtual consultation is nearly double a regular order placed online**, and other brands have noticed similar trends. "The more opportunities we have to talk to a customer, the better," says California Closets CMO Samara Toole.

Some companies are arriving at a client's home with more than just advice. British upholstery brand Maker & Son launched in the U.S. in 2019 with a **network of vans that roll up to clients' homes with sofa and fabric samples.** "People deeply appreciate the convenience of it, and not only from a COVID point of view," says founder Alex Willcock; more than 75 percent of clients who opt for a van visit buy a sofa, many of them while the truck is still in their driveway. The future of shopping isn't just online—it's wherever you want it to be.
